PARTNERSHIP REVENUE INTELLIGENCE

Partnership Strategy Playbook.

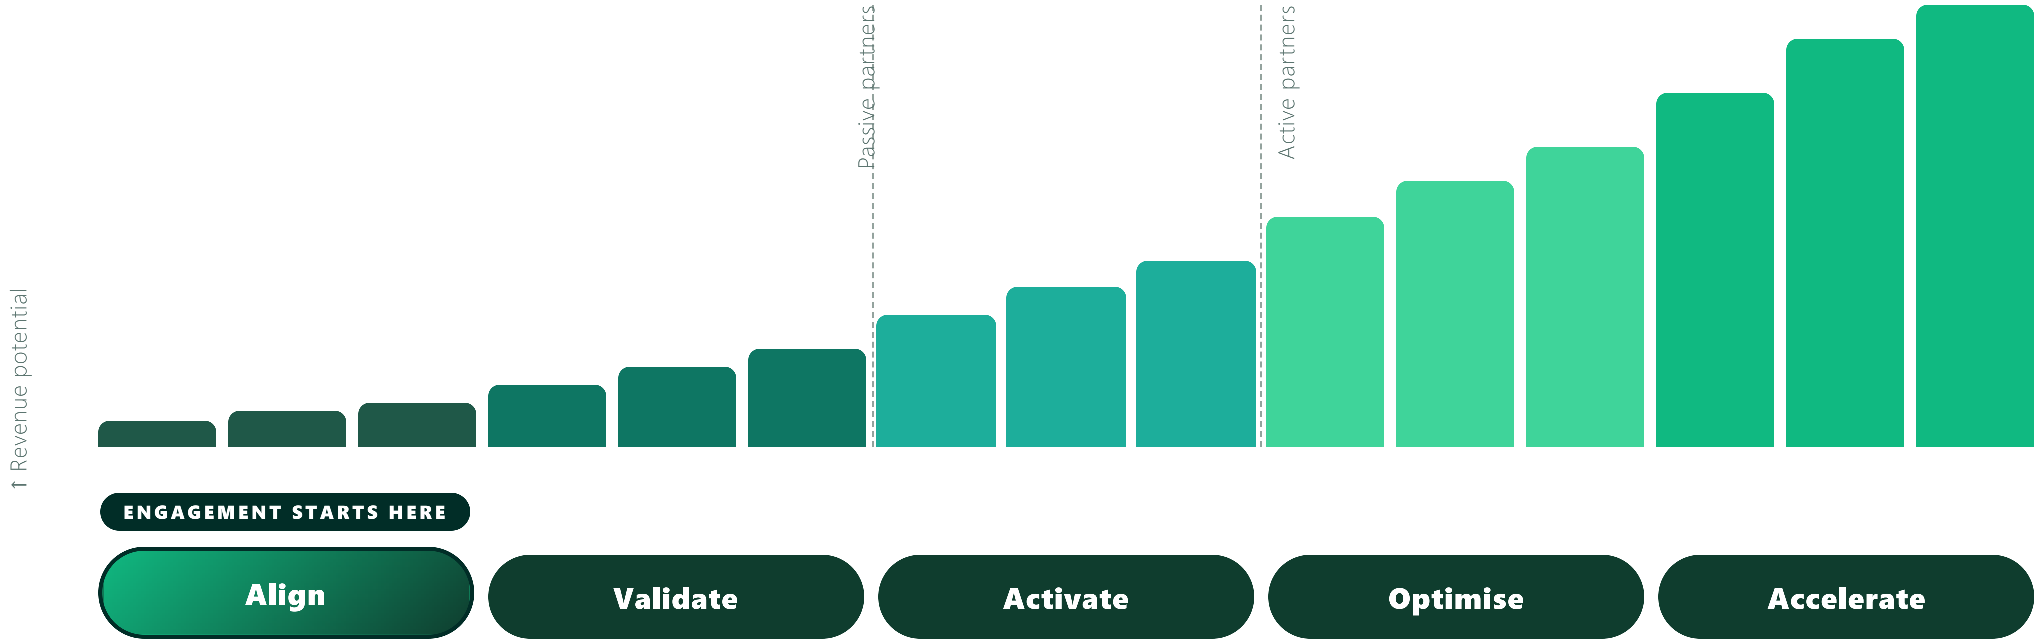
Align Phase.

Agenda.

From the partnership vision and commercial impact analysis through the How-to-Win playbook to the Crawl-Walk-Run workstreams and the key areas of focus.

The HockeyStick Partnerships Framework · five pillars to compounding partner revenue.

Align · Validate · Activate · Optimise · Accelerate. Every engagement begins at Align. HockeyStick walks SafetyCulture through all five pillars. Revenue grows exponentially as partners move from passive to active.



HockeyStick AI-powered enablement layered throughout the program to accelerate results

HOCKEYSTICK · OUR VISION

Vision: To enable partnerships as the primary growth driver ***for ambitious companies,*** **driving exponential outcomes for customers and partners.**

Clients include many leading tech companies

Tech Council of Australia	Australia Post	ELMO	Firmable	Tractor Ventures	Innovation Bay	Stripe
Lawpath	Uber	SafetyCulture	Amaka	NZ Trade & Enterprise	Qsic	Tapestry
WorkflowMax	Easy Agile	CareTeq	ClearCalcs	Affix	Marsello	April

Kloud Connect	Yttrium	ApprovalMax	XBert	Little Phil	Submarine	Inclood

SAFETYCULTURE PARTNERSHIP VISION

Admired by our customers and partners for the value we create together, and the way in which we engage with them.

SafetyCulture is the partner of choice. Partners prioritise their resources, time and operating model toward creating win-wins that achieve business outcomes and drive growth.

What's possible through partnerships?

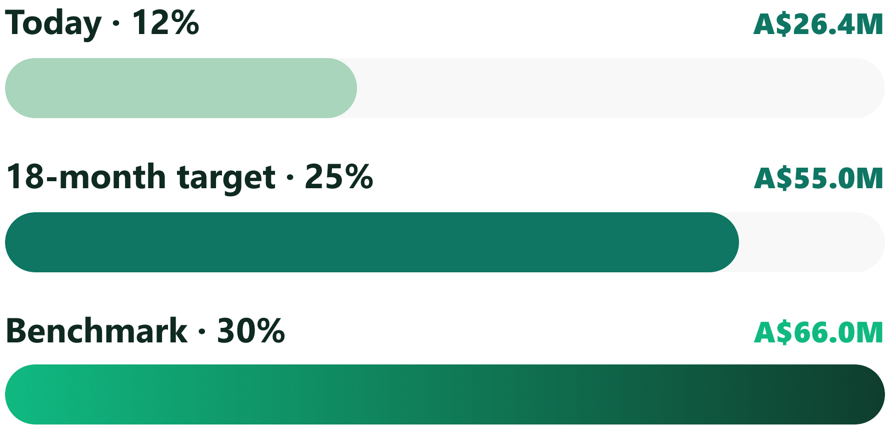
Today partners source 12% of SafetyCulture's A$220M revenue. Moving to the 25% 18-month target and on toward the 30% top-quartile benchmark sizes the partner-attributable revenue on the table.

CLOSEABLE PARTNER-REVENUE GAP · 18 MONTHS

A$28.6M

Closing the gap from today's **12%** to the **25%** 18-month target unlocks A$28.6M of partner-sourced revenue not in the plan today.

PARTNER-SOURCED REVENUE · A$M

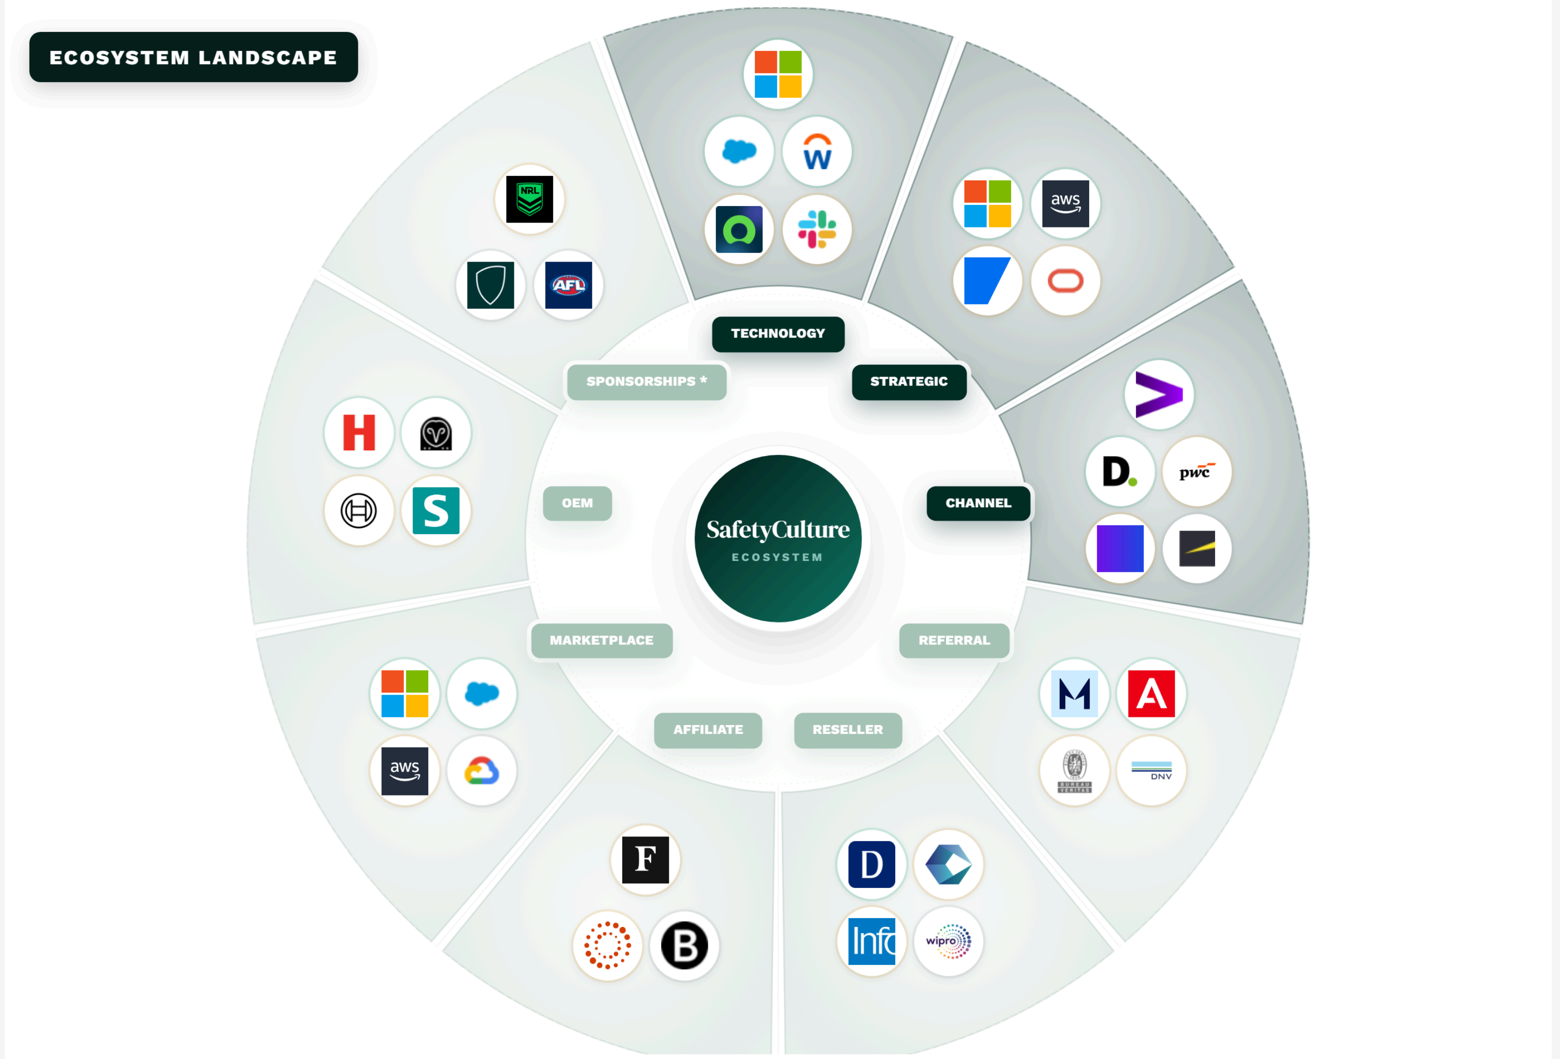


Based on A$220M company revenue · Crossbeam top-quartile benchmark

SECTION 03

The Role of Partnerships.

Ecosystem prioritisation · map.



Partner Categories · Definition, Value Add and Company Outcomes.

The eight canonical partner categories — their definitions, the value each adds, and the company outcomes they drive.

	Technology / ISVs	Reseller	Channel / Solution Partners	Marketplaces
Definition	A third-party company that integrates its platform with yours to unlock new workflows.	A company that resells to customers and makes money on the margin from resale.	A company that provides professional services through sales and delivery motions.	A third-party online marketplace such as AWS, Google or Microsoft.
Value Add	1. Unlock capabilities 2. Brand awareness 3. Adoption 4. Customer reach and access	1. Contractual leverage 2. Financial incentives 3. Ease of procurement 4. Customer reach	1. Capability 2. Capacity 3. Customer reach + access 4. Tailored solutions 5. Adoption	1. Financial incentives 2. Ease of procurement 3. Brand awareness 4. Champions with access to buyers
Company Outcomes	1. Influenced ARR 2. Increase ACV 3. Increase win rates 4. Increase product usage	1. New logo acquisition 2. Market expansion 3. Faster GTM 4. Local compliance + support	1. Lower services delivery cost 2. Increase win rates 3. Increase ACV 4. Increase NRR / GRR 5. Logo acquisition	1. Increased visibility 2. Higher conversion win rates 3. Larger ACV 4. Streamlined procurement 5. Faster time to value

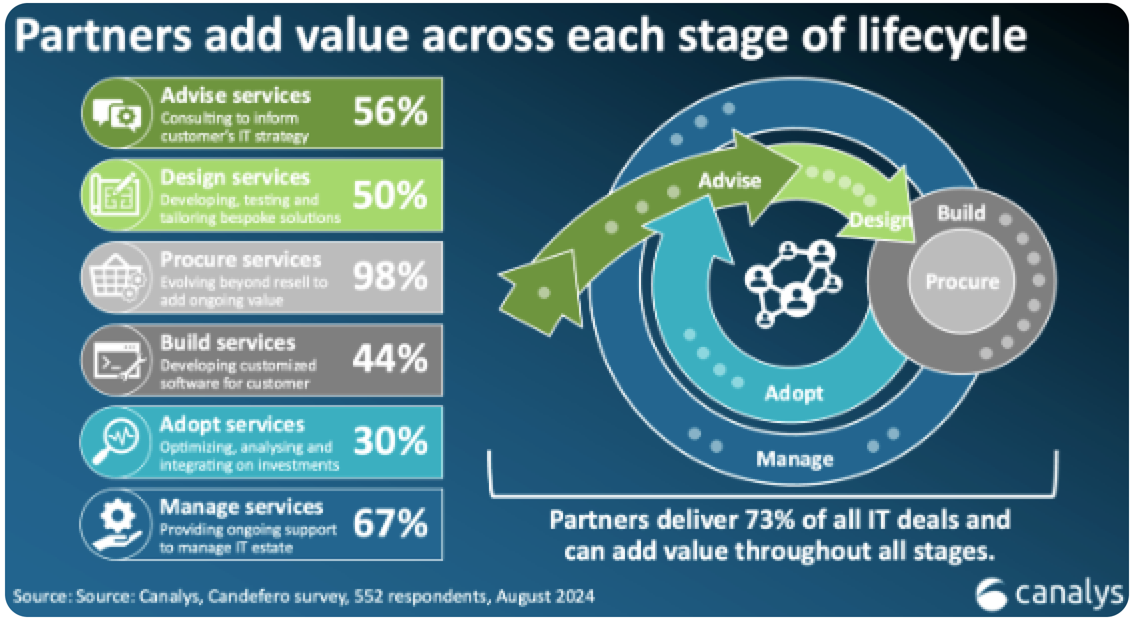
	Referral Partners	Affiliate Partners	Strategic Alliances	OEM / Embedded
Definition	A third party that refers potential customers in exchange for mutual benefits or incentives.	An individual or media partner that earns commission for driving traffic, sign-ups or sales.	A peer-level company alliance that delivers joint GTM and joint product motion.	A third party that embeds your capability inside its product and ships it to customers.
Value Add	1. Influence with buyers 2. Lead qualification 3. Sales capacity 4. Customer acquisition	1. Top-of-funnel reach 2. Always-on content 3. Brand authority 4. Low-touch acquisition	1. Enterprise procurement access 2. Co-sell motion 3. Reference architectures 4. Brand halo	1. Embedded distribution 2. Always-on consumption 3. Compounding without sales load 4. Vertical penetration
Company Outcomes	1. Cost-effective customer acquisition 2. Accelerate GTM 3. New logos 4. ARR growth 5. Geographic expansion	1. Cheaper top-of-funnel 2. Volume sign-ups 3. Brand awareness 4. SEO and domain authority	1. Enterprise pipeline 2. Multi-year contracts 3. Joint roadmap 4. Defensible moat	1. Volume consumption ARR 2. Lower CAC 3. Vertical depth 4. Defensible footprint

GTM MODELS ARE SHIFTING

Partners are expanding their services *before, during and after* the transaction.

A partner ecosystem model (including the people, processes, program & underlying technology) has moved from *a nice-to-have* to *a need-to-have*.

Jay McBain
Chief Analyst, Canalys



ECOSYSTEM MATURITY · DIAGNOSTIC FINDINGS

SafetyCulture is Developing on the partnership ecosystem maturity scale.

Composite 2.1 / 5.0 · benchmark 4.0 for Late-Stage / Pre-IPO programmes (–1.9). Align-phase work will compound.

67%
READINESS

PARTNERSHIP READINESS · DIAGNOSTIC

SafetyCulture is Amber across 3 of 7 readiness categories.

1 Red 3 Amber 3 Green

9 blockers to resolve

People 2.5/5

Right team, structure and seniority. Partner team headcount, RevOps support and exec sponsor seniority. Weak score means activation outpaces delivery.

AMBER

2 blockers

Process 4.1/5

Repeatable mechanics across the engagement. Playbooks, deal-reg flows, attribution rules and joint-motion templates. Strong score means partner work is operational, not artisanal.

GREEN

0 blockers

Programs 3.8/5

Formal partner-program structure. Tiering, certifications, MDF and commercials per category. Strong score means each category has a defined incentive shape.

GREEN

1 blocker

Technology 1.6/5

Systems and accessibility for partners. PRM, CRM partner-attribution fields and integration plumbing. Weak score blocks every other pillar — partners cannot transact at scale.

RED

3 blockers

Data 2.8/5

Partner activity tracking + attribution. Sourced + influenced revenue, partner scorecards, dashboards. Weak score means partners cannot be measured or rewarded.

AMBER

2 blockers

Budget 2.4/5

Funding protocol + MDF envelope. Joint marketing dollars, co-sell incentives, partner-manager headcount. Strong score frees the team to invest into activation.

AMBER

1 blocker

Exec buy-in 4.5/5

Senior leadership ownership across the C-suite. Exec sponsor cadence, partnership at QBRs, board-level visibility. Strong makes partnerships an embedded priority.

GREEN

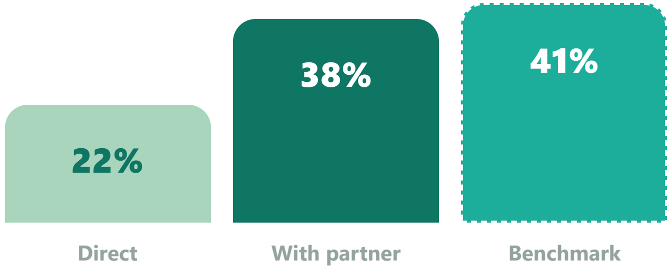
0 blockers

Customer revenue left on the table.

Cohort evidence on contested opportunities. Three metrics move when a partner is in the deal: close rate, contract value at signature, and adoption after onboarding.

WIN RATE

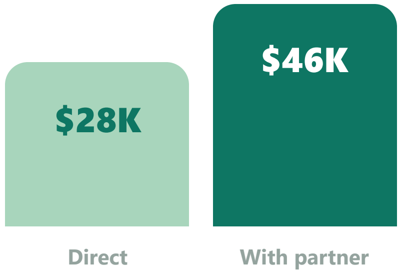
Share of qualified opportunities that close.



Gap to benchmark: +19%

AVERAGE DEAL SIZE

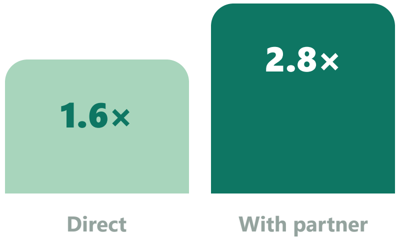
Average annual contract value per closed deal.



Lift: +64%

WEEKLY ACTIVE USERS

Adoption multiple. Average users per account relative to a no-partner baseline of 1×.



Lift: +75%

ANNUAL MISSED REVENUE · THE COMMERCIAL HOOK

$1.7M left on the table

Closing the gap from a 22% direct win rate to the 41% partner benchmark, applied to annual qualified opportunity volume and average annual contract value.

INPUTS

Benchmark gap	19%
Annual contract value	$28.0K
Annual opportunities	320

Formula: (benchmark − direct) × annual contract value × annual opportunities.

Where to play, how to win.

SafetyCulture's partnership strategy on one page. Five strategy questions that frame the partnership programme.

01 · VISION **What is our winning aspiration?**	Become the global standard frontline-operations platform for safety-critical industries, building a category-defining partner ecosystem that delivers 22% of new ARR by T+180 and 34% by Year 2, anchored on hyperscaler co-sell, Tier-1 GSI delivery, and an embedded ISV programme.
02 · PLAY **Where will we play?**	Primary: ANZ + NAM enterprise frontline operations, scaled through Hyperscaler co-sell (Microsoft / AWS) and Tier-1 GSI delivery (Accenture / Deloitte / PwC). Secondary: embedded ISV motion across industrial IoT + EHS-adjacent platforms. Verticals: manufacturing, mining, construction, healthcare.
03 · WIN **How will we win in chosen markets?**	Integrator-first GTM with named partner managers reporting into Revenue. Software-led differentiation through native integrations and a procurement-ready pricing track. Fast POCs anchored on Activation. Outcome bias: partner-influenced ARR plus joint reference logos every quarter.
04 · CAPABILITIES **What capabilities must we have?**	Named Head of Partnerships reporting into the CRO. Dedicated RevOps embed for partner attribution and scorecard cadence. Certification programme for Sales + Partner Managers. C-Suite or President-level executive sponsor on the fortnightly partnership review.
05 · SYSTEMS **What management systems do we need?**	CRM partner-attribution fields and workflows. PRM (Crossbeam / PartnerStack) for deal registration and pipeline visibility. Centralised collateral hub for sales, technical, and marketing materials. Quarterly MDF envelope sized to the top 3 categories.

MAPPING PARTNERS TO THE CUSTOMER JOURNEY

Technology · ISVs.

***Category:* Technology · ISVs**

| What this category brings to SafetyCulture: native software integrations that deepen the SafetyCulture stack into customers' enterprise systems — Microsoft, Salesforce, Workday, ServiceNow, Slack.

CUSTOMER NEED #1 ☆

Workflow consolidation

Reduce app sprawl by surfacing inspection data inside Teams, Slack, Salesforce and ServiceNow.

CUSTOMER NEED #2 ☆

Data flow + reporting

Push inspection + incident records into the enterprise data warehouse and BI tooling (Power BI, Tableau).

CUSTOMER NEED #3 ☆

Identity + access control

Enterprise SSO, SCIM provisioning, conditional access via the same identity provider.

CUSTOMER NEED #4 ☆

Compliance automation

Auto-route findings to GRC + ITSM platforms; align audit evidence with existing controls.

Customer need #5 ★

AI + analytics depth

Apply enterprise AI (Copilot, Einstein, Now Assist) directly to SafetyCulture data, without an extra integration team.

MAPPING PARTNERS TO THE CUSTOMER JOURNEY

Strategic · Hyperscalers.

Category: *Strategic · Hyperscalers* | ***What this category brings to SafetyCulture: industrial-IoT-grade cloud + AI platform with marketplace co-sell and procurement velocity for enterprise — AWS, Microsoft Azure, SAP, Oracle.***

CUSTOMER NEED #1 ☆

Procurement velocity

Hyperscaler marketplace co-sell compresses enterprise procurement cycles from 12 weeks to 2.

CUSTOMER NEED #2 ☆

Reference architecture

Joint reference architectures for industrial IoT, EHS, and regulated workloads on the customer's chosen cloud.

CUSTOMER NEED #3 ☆

AI-native roadmap

Copilot for Frontline Workers + Bedrock + S/4HANA integration. Co-built AI embedded in inspections.

CUSTOMER NEED #4 ☆

Co-sell pipeline

Joint named-account targeting through Azure ISV / AWS Co-Sell / SAP ISA programmes.

Customer need #5 ★

Defensible moat

Anchor on a hyperscaler's industry-vertical AI strategy. Competitors cannot rebuild SafetyCulture-native AI inside the customer's chosen cloud.

MAPPING PARTNERS TO THE CUSTOMER JOURNEY

Channel · GSIs.

Category:* Channel · GSIs** | ***What this category brings to SafetyCulture: Tier-1 implementation muscle, vertical-industry depth, and boardroom credibility for enterprise rollouts — Accenture, Deloitte, PwC, KPMG, EY.

CUSTOMER NEED #1 ☆

Implementation capacity

Tier-1 GSI delivery muscle for enterprise rollouts SafetyCulture cannot service direct.

CUSTOMER NEED #2 ☆

Vertical depth

Industry practice depth across resources, healthcare, consumer for safety transformation.

CUSTOMER NEED #3 ☆

Change management

Org-wide adoption frameworks for safety culture transformation alongside the platform deployment.

CUSTOMER NEED #4 ☆

Boardroom credibility

Tier-1 advisor signature unlocks the CFO + audit committee buyer in regulated industries.

Customer need #5 ★

Geographic expansion

Unblock international enterprise expansion (EMEA, AMER) through the GSIs' on-ground delivery capacity outside ANZ.

SECTION 04

The Commercial Impact of Partnerships.

Partnership GTM Channels · Top-Down model · Yr 1 + Yr 2.

Expected Partnership Revenue per year drives the Revenue derived cell on every channel card. Per channel per year: Leads input × Trial Conv % = Trials, × Activation % = Activations, × Revenue % of Expected Partnership Revenue = Revenue.

SECTION 05

How to Win.

What we want from partners · across the journey.

Partner expectations at each customer-journey stage. Each item has a maturity marker: C = Crawl baseline must-have · W = Walk repeatable motion · R = Run scaled and strategic.

	Awareness	Consideration	Activation	Expansion	Retention
Partner activities	C · Participates in at least 2 joint events / yr C · Uses approved SafetyCulture brand kit + messaging W · Runs a repeatable awareness motion (LinkedIn, podcast, content) W · Reports activity volume quarterly R · Operates a governed second-degree partner program	C · Submits a clear hand-off to a SafetyCulture seller W · Tracks buyer stage in shared CRM / PRM R · Operates a governed partner sourcing motion R · Provides category authority signals (analyst coverage)	C · Supports handover from sales to onboarding W · Runs a repeatable activation motion W · Reports activation activity quarterly R · Operates a governed delivery network R · Contributes adoption playbooks for SafetyCulture	C · Identifies and flags expansion signals C · Participates in at least 1 joint expansion play / yr W · Runs a repeatable expansion motion W · Reports expansion activity quarterly R · Operates a governed expansion network	C · Monitors and reports churn-risk signals C · Participates in at least 1 customer success review / yr W · Runs a repeatable success motion W · Reports customer health quarterly R · Operates a governed customer-success network
Partner value add	C · Contributes trusted brand authority W · Packages audience and reach reporting R · Creates a scalable awareness asset library	C · Contributes buyer context to the pitch W · Packages buyer conviction collateral (battlecards, case studies) R · Creates scalable buyer-content assets	C · Contributes implementation capacity W · Packages implementation playbooks R · Creates scalable implementation assets	C · Contributes use-case expansion W · Packages use-case adoption R · Creates scalable expansion assets	C · Contributes customer health signals W · Packages customer success programmes R · Creates scalable retention assets
Business outcomes	C · Produces a visible top-of-funnel lift W · Improves repeatable lead volume R · Sustains measurable brand awareness gain	C · Produces a visible influenced pipeline W · Improves repeatable conversion to opportunity R · Sustains measurable sourced-pipeline contribution	C · Produces a visible activation rate lift W · Improves repeatable activation velocity R · Sustains measurable onboarded volume	C · Produces a visible expansion ARR uplift W · Improves repeatable NRR contribution R · Sustains measurable expansion ARR	C · Produces a visible retention rate uplift W · Improves repeatable customer-health scores R · Sustains measurable GRR uplift

What SafetyCulture offers partners · across the journey.

Across the journey. With a Crawl / Walk / Run build. What SafetyCulture brings to each partner at each stage, expressed as activities, value-add and business outcomes. The mirror image of the previous page.

	Awareness	Consideration	Activation	Expansion	Retention
Our Activities	C · Co-branded thought leadership C · Joint webinar + podcast slots W · Always-on social co-amplification R · Partner-led HSA event programme	C · Joint battlecards + case studies W · Joint demo environments R · Co-sell + deal-reg motion	C · Onboarding training + certifications W · Joint implementation playbooks R · Co-delivered enterprise rollouts	C · Shared expansion playbooks W · Joint customer business reviews R · Co-funded expansion campaigns	C · Customer success enablement W · Health-score dashboards R · Joint retention QBRs
Our Value Add	SafetyCulture audience reach · brand authority · MDF.	Buyer access · lead routing · co-sell IP.	Activation toolkit · certified consultants · tooling.	Expansion plays · joint roadmap · integrations.	Customer health data · renewal toolkits.
Our Business Outcomes	Partner-sourced top of funnel · lower CAC.	Partner-sourced pipeline · faster sales velocity.	Higher activation rate · faster time-to-value.	Higher NRR · expanded ACV.	Higher GRR · reduced churn.

SafetyCulture creates additional value to earn partner attention.

Partners already make money the way they make money today. Anything we offer has to be additive to that motion, not parallel to it. Every input we drive must connect to partner revenue.

TOP OF FUNNEL · TODAY'S MOTION

Typical implementation partner core operating model

ACTIVITIES

Builds a niche speciality services business
Depends on software providers for leads + integration
Earns revenue on implementation + integration
Faces capacity ceilings and limited expertise

OUTCOMES

Grow services business
Grow revenue as expertise
Grow brand awareness

Grow $$

ADD THE SAFETYCULTURE MOTION ↓

BOTTOM OF FUNNEL · ADDITIVE MOTION

SafetyCulture creates additional value to earn partner attention

ACTIVITIES

Embed SafetyCulture value prop into partner-led plays
Create high-revenue services partners can sell
Extend value alongside the partner motion (not parallel)
Help partners broaden their total addressable market

OUTCOMES

Grow services business
Grow revenue as expertise
Grow brand awareness in target

Add more revenue $

The implication: every value statement SafetyCulture makes to partners must connect to *their* revenue, not ours. Partners pick partners who help them sell more services.

SECTION 06

Crawl, Walk, Run Strategy.

Four key workstreams to make this partnership program a success.

The highest-leverage workstreams across the first 90 days. Each compounds into the 18-month 25% partner-sourced target.

WS-01 ★

EFFORT · HIGH

ROI · HIGH

Stand up the partnerships function

Name a Head of Partnerships reporting into Revenue. Stand up the RevOps embed for partner attribution. Set fortnightly executive partnership review cadence.

OWNER
Alex Chen · CRO

WINDOW
Day 0 → Day 28

WS-02 ★

EFFORT · HIGH

ROI · HIGH

Activate top 12 priority partners

Per-partner activation kit across Q1/Q2: champion, contract paper, joint motion, T+30/T+90 success criteria. Scope: Microsoft, AWS, Salesforce, Workday, ServiceNow, Accenture, Deloitte, PwC + 4 more.

OWNER
Priya Singh · Head of Partnerships

WINDOW
Day 28 → Day 75

WS-03 ★

EFFORT · MED

ROI · HIGH

Lock executive alignment + targets

Run the workshop with the executive sponsor and lock the 12 / 24-month partner-sourced targets (25% / 34%). Fortnightly partnership review cadence with the CRO.

OWNER

ROI · HIGH

Bottom-up model + Crawl/Walk/Run cadence

Build the Bottom-Up Partnership Model (8 categories × 4 regions). Run the Crawl / Walk / Run review with the executive sponsor every 90 days. Reconciles top-down vs bottom-up.

OWNER
Priya Singh + Alex Chen

WINDOW
Day 20 → ongoing

Crawl · Walk · Run Strategy.

Phasing the path forward. The partnership plan bucketed by due date into Crawl (Days 1-90), Walk (Days 90-180) and Run (Days 180+). Crawl lays the foundation, Walk builds the partner motion, Run scales the programme.

CRAWL — Days 1-90

- Run the workshop and lock 12 / 24-month targets
- Reconcile partner-sourced ARR target (<5% variance)
- Stand up the partnerships function with a named owner
- Land the top 3 priority categories as Year-1 commitments
- Run partner-program qualification on the top 12 (4-C + customer gate)
- Migrate to canonical 4-C ICP scoring across all recommended partners
- Ship the executive scorecard + cadence (weekly · monthly · QBR)
- Build the partner-facing value proposition
- Define partner expectations · behavioural · commercial · cultural
- Close the integration-readiness blockers
- Build the Bottom-Up Partnership Model (8 cats × 4 regions)
- Wire inputs → outputs and prove the measurement loop
- Activate top 12 priority partners across Q1/Q2 with named owners
- Run the Crawl / Walk / Run review every 90 days

WALK — Days 90-180

- Map second-degree partners and name intersections to drive co-activation
- Build the Non-Financial Partner Marketing programme (10 motions, ranked)
- Lock partner expectations across the 5 customer-journey stages
- Stand up CRM/PRM with partner-attribution fields + workflows
- Launch the partner programme publicly (collateral + comms + portal)
- Hit 12% partner-sourced of new ARR by T+180

RUN — Days 180+

- *Scale the programme. Move from 12% partner-sourced (T+180) toward the 25% 18-month target and the 34% Year-2 aspiration anchored on hyperscaler co-sell, Tier-1 GSI delivery and embedded ISVs.*

Key areas of focus · 24-month timeline.

Starred workstreams plotted across the next 24 months by due date. High-priority milestones in red, medium in amber, sustained outcomes in emerald.
